

**Machine difficult to
machine hardened dies
up to 50HRc with *Ease***

**Best Suited for
Hard Dies & Steel
machining...**

TX

205-206 Series End mills

FEATURES & BENEFITS :

- All Tools are Hyperlox – PVD coated
- Stronger cutting edges than a flat or concave relief
- Smoother edges and better finishes on the cutting edges
- Longer tool life
- Especially designed for Die-Mold Industry
- For Higher Productivity & More aggressive cuts you can opt for 301~307 Series

APPLICATION:

- Best suited for machining materials like Die-Steel, Tool Steel with hardness range of up to 50HRC
- They are best for machining materials like D2, D3, H13, P20 and other tool steels
