

High Performance COOLANT-FED Drills

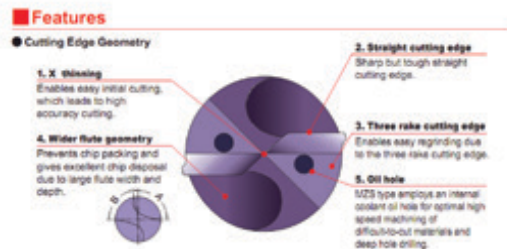

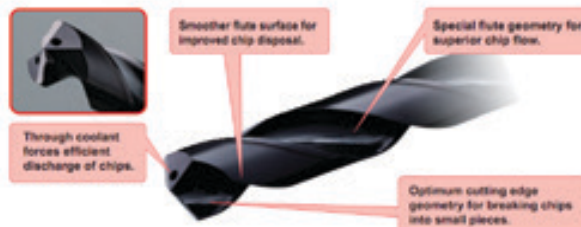

**70% Higher Speed and
Feed rates than
standard Carbide
Drills**

CTHS, CTHL Series Coolant-Fed High Performance Drills

FEATURES & BENEFITS :

- High performance - high penetration solid submicron grain carbide drill
- Minimum 500 psi of coolant pressure recommended for proper usage
- Up to 70% higher feed & speed rates than standard carbide drills
- 30° helix for better chip evacuation
- Recommended to run in high nickel, high temperature alloys, stainless steels and alloy steels
- CTHS Series is recommended for 3D~5D drilling depths and CTHL Series is recommended for >7D Drilling Depths
